

Stressballs from recycled materials

For clients with an ethical message

Re-Made in the UK

80 tonnes of pre-used materials destined for incineration, are being turned into the most effective marketing aids money can buy!

Our clever technicians are reformulating and blending these redundant materials on site in our UK factory, and turning them into stressballs.

Benefits to your clients:-

- No environmental cost for waste disposal.
- Up to 75% recycled polyurethane materials.
- Re-use of materials of petrochemical origin.
- Available in any shape.
- Made in the UK - far less energy content in manufacturing and transport than imported material.
